QUALITY POLICY

READS ELECTRIC COMPANY PROPRIETY LIMITED, established in 1959, provides a total electrical repair service to industry and shipping. Our Fremantle based repair facility efficiently services the Port of Fremantle, the surrounding industrial areas, and also directs our International / Interstate activities.

The provision of an efficient and reliable service to meet our customer's needs and expectations has, and will always be, our prime objective. To confirm our commitment to this, we have formalised our documented procedures to comply with the quality system standard AS/NZS ISO 9001:2015 and the hazardous area electrical equipment overhaul and repair standard AS/NZS 3800:2012. Our systems enable us to provide extensive after sales service and confirms our policy to provide the most efficient and reliable service possible. Third party independent audits certify our quality system.

The Reads Electric Quality Manual lists our procedures, confirms our commitment to quality improvement through setting and reviewing quality objectives and provides an overview of the company's organisation. It also stipulates how we conform to legislation and regulations of the quality standard to satisfy applicable requirements.

It is our firm belief that the company's commitment to quality continual improvement will be of benefit to our customers and our business.

Mark Wilson
General Manager
